The Reebok logo positioning looks ok to me considering this jersey is being stretched out over shoulder pads
I've circled what seems to be a hole in the jersey and you'll notice there is a team repair in that exact spot on the HA jersey.
The top stitch seems different than what shows on the HA jersey. As if there are two vertical stitch lines that run parallel with one another.
The bottom stitch seems to match. You'll notice a black spec just behind the stitching.
